

RESIDENTIAL WATER FILTER SYSTEM

COOEE WATER TWIN UNDERSINK & INLINE ALKALINE WATER FILTER

MODEL: TW-ALK

What is an Alkaline Water Filter ? Alkaline filters replace healthy minerals back into the water prior to drinking it. It also turns acidic water into alkaline water, creating the perfect pH balance for your body by raising the pH to a range between 8.5 – 9.0. It enhances the water's structure and energetic properties for better hydration, a healthy immune system and general health and wellbeing.

How the system works - The Cooee Water Twin & Alkaline Undersink Filter System is neatly plumbed via your mains supply underneath the sink. The water is fed through the twin filters (Pre sediment filter and PB1 0.5 micron Carbon filter cartridge), removing the harmful chlorine, chemicals and contaminants. The Pi-Alkaline filter is on the final tubing line so it adds in the beneficial minerals, including Calcium, Potassium, Magnesium and trace minerals as well as increasing the alkalinity of your water.

The water then dispenses from the chrome ceramic disc faucet (lead free interior) on top of your benchtop to give you an endless supply of filtered Alkalised great tasting water.

- * Filter cartridges should be replaced on average 12 monthly, our automated data base will let you know when your filters are due.
- * These units should be used on a cold water supply of town water.
- * Your system will come complete with all the fittings needed and easy to follow installation instructions.

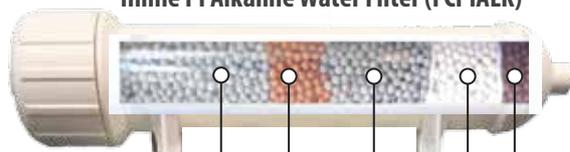

SPECIFICATION - 350mm (w) x 420mm (h) x 120mm (d)

Pre Filter (FCSED1) - 1 micron nominal sediment reduction pre filter cartridge for the removal of dirt, rust and sediment.

Carbon Block PB1 Filter (FCPB1) - 0.5 micron carbon block filter cartridge for the removal of chlorine, taste, odours, lead, heavy metals, Cryptosporidium & Giardia Cysts. (NSF Rated International under NSF/ANSI Standard 42).

Inline PI Alkaline Water Filter (FCPIALK)

Oxygenating ceramics to eliminate harmful free radicals

Far Infrared function promotes growth of healthy cells

Alkalisating ceramics including Toumaline to add Calcium, Magnesium, Potassium and other trace minerals

Magnetizing Ceramics to energise water

Maifan stone ceramics to add minerals
