

RESIDENTIAL WATER FILTER SYSTEM

COOEE WATER OMNI UNDERSINK

MODEL: OMNI

Slimline compact design for kitchens with limited space

Its slimline compact design is perfect for kitchens with limited space. The Cooee Water Omni Undersink Filter System is neatly plumbed via your mains supply underneath the sink. The water is fed through the dual cartridges (Pre sediment filter and 1 micron Carbon filter cartridge) removing the harmful chlorine, chemicals and contaminants from the water.

The filtered water then dispenses through a separate chrome faucet (lead free interior with ceramic disc) on top of the sink. This unit provides you with an endless supply of filtered great tasting water.

- * Filter cartridges should be replaced on average 12 monthly, our automated data base will let you know when your filters are due.
 - * These units should be used on a cold water supply of town water.
 - * Your system will come complete with all the fittings needed and easy to follow installation instructions.
- Other tap options available on request.

These units have easy to change twist off filter cartridges for a quick and hygienic filter change.

SPECIFICATION - 180mm (w) x 330mm (h) x 80mm (d)

Pre Filter (Q5505) - Sediment reduction pre filter cartridge for the removal of dirt, sand rust and sediment.

My partner and I bought our first property a small studio apartment, its perfect for just us, but space was limited especially in the kitchen. It was great to have the Omni Dual filter system as an option as we only had a skinny cupboard that would allow us to plumb the unit it. Because the cartridges are a quick turn and click change it makes it easy every year to replace the cartridges too.
