

RESIDENTIAL WATER FILTER SYSTEM

COOEE WATER TWIN UNDERSINK

MODEL: TW-FL

The Cooee Water Twin Undersink Filter System is neatly plumbed via your mains supply underneath the sink. The water is fed through the twin filters (Pre sediment filter and Fluoride reduction carbon filter cartridge) removing the harmful chemicals and contaminants.

The filtered water then dispenses through a separate chrome faucet (lead free interior with ceramic disc) on top of the sink. This unit provides you with an endless supply of filtered great tasting water.

- * Filter cartridges should be replaced on average 12 monthly, our automated data base will let you know when your filters are due.
- * These units should be used on a cold water supply of town water.
- * Your system will come complete with all the fittings needed and easy to follow installation instructions.

SPECIFICATION - 270mm (w) x 340mm (h) x 120mm (d)
(For undersink module / Twin housings incl bracket)

“
Thanks Cooee, my family and I are loving the convenience of having filtered water at the sink. It was also great to have options with what kind of filter cartridge we could use in our system. Having the Fluoride reduced from the water was an important option for myself and my family. Thanks again, I will definitely be recommending your business to my family and friends.
