

RESIDENTIAL WATER FILTER SYSTEM

COOEE WATER TWIN UNDERSINK

MODEL: TW-PB1 -1/2

USE YOUR
EXISTING
TAP

The Cooee Water Twin Undersink Filter System with 1/2" Ports is connected to your existing tap on the cold water line neatly plumbed underneath the sink. The water is fed through the twin filters (Pre sediment filter and PB1 0.5 micron Carbon filter cartridge) removing the harmful chemicals and contaminants.

All cold water dispensed from your tap is filtered. Great if you don't want to have a separate tap or have a sink that does not allow for it. This unit provides you with an endless supply of filtered great tasting water.

- * Filter cartridges should be replaced on average 6-12 monthly, our automated data base will let you know when your filters are due.
- * These units should be used on a cold water supply of town water.
- * Your system will come complete with all the fittings needed and easy to follow installation instructions.

SPECIFICATION - 270mm (w) x 340mm (h) x 120mm (d)
(For undersink module / Twin housings incl bracket)

Pre Filter (FCSED1) - 1 micron nominal sediment reduction pre filter cartridge for the removal of dirt, rust and sediment.

Carbon Block PB1 Filter (FCPB1) - 0.5 micron carbon block filter cartridge for the removal of chlorine, taste, odours, lead, heavy metals, Cryptosporidium & Giardia Cysts. (NSF Rated International under NSF/ANSI Standard 42).

“Recently we purchased a new home and our new kitchen has a country style stone double sink so the design of it would not allow for a second tap to be installed. Because we had a filter in our old house we had been a customer of Cooee Water's for over 10 years so we knew they had other solutions for filtered water options. We are local so we even had them come out and install it for us, it was so easy.
